

AS A COMPANY

**we have taken the Operation
Clean Sweep (OCS) pledge**

Operation Clean Sweep® is an international program designed to help prevent resin pellet, flake and powder loss and help keep resin out of the marine environment. Every segment of the plastics industry has a role to play—including resin producers, TRANSPORTERS, bulk terminal operators and plastics processors—by implementing good housekeeping and resin containment practices.

As our transportation partner we ask that you join us in our OCS pledge to help prevent resin pellet, flake and powder loss.

WE ONLY GET ONE WORLD

Please stand with us and your peers
in the plastics industry in working to
prevent resin pellet, flake and powder
loss into our environment

VISIT

www.opcleansweep.org

to learn more about the US OCS
program and for tools that can help
your company work towards zero
resin pellet, flake and powder loss.

WORKING TOGETHER TO STOP RESIN LOSS

**Help Us to Prevent
Resin Pellet, Flake
and Powder Loss
Into the Environment**

OPCLEANSWEEP.ORG

JOIN

your supply chain colleagues in the Plastics industry by following key housekeeping procedures to help us prevent resin entering the waterways in the USA

We ask that you:

- 1 Join us** in this commitment to helping prevent resin loss into the environment
- 2 Conduct an audit** of your process to identify areas that could be of concern and identify ways to address them
- 3 Discuss any concerns** with us as we maybe able to help find a solution
- 4 Raise awareness** of your employees and create accountability
- 5 Follow up and enforce procedures—** when management cares, employees will, too!

FOR TOOLS AND GUIDELINES

to help you with this task, please refer to the OCS website and the Manual

- ▶ www.opcleansweep.org
- ▶ www.opcleansweep.org/manual

Take it a step further and take the OCS pledge yourself! This voluntary stewardship program is easy to join and be recognized for.

WE ASK YOU

to join us by taking the pledge

THE VALUE OF OCS

Spilled resin pellets, flakes and powder can make their way into local waters and eventually end up in our oceans where they create both a litter problem and a threat to sea life. Preventing resin pellet, flake and powder loss requires your help. By helping us adhere to our OCS pledge or by joining us by taking the pledge yourself, the environment wins and so does the plastics industry.

By implementing the OCS practices and principals we strengthen our:

- Contribution to preserving water quality and wildlife
- Compliance with federal, state, provincial and municipal regulations
- Employee health and safety
- Operational efficiency
- Financial bottom line
- Reputation in the community
